GP Power Tools

The Premier Tool for Dynamics GP Administrators.

ADMINISTRATOR TOOLS

- Avoid data entry errors! Company based colour schemes provide a visual cue.
- Full administrative and audit control of your security, inc. Deny-Based Security.
- Roll out Dex.ini settings and Launch File changes to all workstations.
- Simplify troubleshooting by disabling third party products and customizations.
- Users can Customize window positions and sizes based on their preferences.
- Manage user licenses with user activity tracking, automatic logout and login limits.

DEVELOPER TOOLS

- Create scripts inside Dynamics GP, using Dexterity, Transact-SQL, C# and VB.Net.
- Create triggers to schedule events, customize Dynamics GP, and debug issues.
- Build custom Report Writer functions, SBA Web Services and URL Drill Backs.
- Create Self Service scripts with parameters for users to fix issues themselves.
- Group resources into projects for easy maintenance and exporting & importing.
- Create Custom SQL Tables, Virtual Fields, and Custom Forms (with VSIT product).

FORM CONTROL TOOLS

- Add "No Code/Low Code" customizations to Dynamics GP for any window or field.
- Replace Field Level Security with a more powerful and easier to maintain system.
- Has over 60 rules to apply many common customizations without needing code.
- Use resource filters to seamlessly apply rules across multiple windows and fields.
- Add Passwords with multilingual dialog prompts to any form, window or field.
- Works with Developer Tools to allow code to be applied across multiple resources.

DATABASE TOOLS

- Synchronize SQL Server settings to match Dynamics GP Companies and Users.
- Update Logins after moving to a new SQL Server or creating test environments.
- Minimize upgrade issues by validating system data and database table structures.
- Identify and fix issues with company record notes and note index values.
- Recover unused space and apply SQL compression to tables in SQL Databases.
- Generate friendly views and optimize Auto Procedures to maintain performance.

Plus, get these powerful IT Support features with the purchase of any module:

- Capture and email five different system logs with "One-Click."
- Capture and email a system status report and screenshots of all windows with "One-Click".
- Send emails from inside Dynamics GP even with no email client installed.
- Change Dex.ini and registry settings from inside GP, including making GP work well on high resolution monitors.

Download a free 30-day trial period using the QR Code.
